

**Core Policy;**

A used compressor is not considered a Core unless it can be remanufactured.

The Compressor qualifies as a core if:

1. The compressor unit has not been altered or taken apart.
2. No casing damage is evident
3. The clutch assembly is attached to the compressor.
4. All wiring must be attached and uncut.
5. The clutch drive shaft must smoothly rotate 2 (two) complete revolutions in both directions.
6. Some suction and discharge pressure must be evident.

Compressortech reserves final discretion as to whether a unit qualifies as a Core.
